**Subject:** Sunnyside Gold Work Plans

Dear Stakeholders –

We have received work plans from Sunnyside Gold related to investigating surface and subsurface metal loading to the Animas River from above Arrastra Gulch to Silverton. The plans are quite extensive. Sunnyside is putting a lot resources into the effort.

Please let me know if you are interested in receiving these files. They are pretty large, so I don't want to send them out to everyone. Sunnyside would like to receive comments on the plans as soon as possible. (For example, they are planning on using helicopters for geophysical surveying in this reach next week.)

I think we will all find their results quite interesting.

Peter Butler
